

SHAMSEAR EBRAHIM

Software Developer | AI-Assisted Development

shamsear@gmail.com • 70485214 • LinkedIn • Portfolio • Doha, Qatar

SUMMARY

Computer Science graduate with practical paid software-development experience building and deploying business applications. Experienced with Next.js, React, TypeScript, JavaScript, Node.js, APIs, databases and Git. Built paid projects including a warehouse management system, billing software and Shopify e-commerce websites. Experienced in using AI coding tools to accelerate development while independently reviewing and validating generated code.

SKILLS

- **Frontend:** Next.js, React, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
 - **Backend:** Node.js, Flask, REST APIs
 - **Database:** PostgreSQL, MySQL, SQL
 - **Tools:** Git, GitHub, Cursor, Claude Code, Codex, Windsurf
 - **Other:** Shopify/Liquid, UI/UX, API Integration, Debugging, Deployment
-

PROFESSIONAL EXPERIENCE

Software Developer

Jul 2024 – 2026

Bahrain/Remote

- Built and delivered a warehouse management system using Next.js, TypeScript, React, APIs and database technologies based on business requirements.
 - Developed billing software, implementing application workflows, data handling, validation and API/database integration.
 - Built and customized Shopify e-commerce websites using Liquid, JavaScript, HTML/CSS and responsive UI development.
 - Worked directly on requirements, feature development, debugging, testing, deployment and iterative improvements.
 - Used AI-assisted development tools including Cursor, Claude Code and Codex to accelerate development while reviewing and validating generated code.
-

PROJECT

Billing Software — Node.js, JavaScript/TypeScript, APIs, Database

- Developed a practical billing application using Node.js, implementing business workflows, data handling and user-facing features.
- Built and integrated backend APIs with database operations, validation and error handling.
- Debugged and tested application workflows to ensure reliable functionality.

Warehouse & Inventory Management Web Platform

- Engineered a full-stack Next.js and Python (FastAPI) management system to track real-time stock levels, inbound shipments, and internal asset allocations.
 - Implemented secure database structures and RESTful APIs to ensure continuous data availability and high transaction throughput.
-

EDUCATION

B.E. Computer Science & Engineering

Nov 2020 - Jun 2024

P.A. College of Engineering

- CGPA: 7.4/10
